

KIELER Actor Oriented Modeling

Kiel Integrated Environment for Layout
Eclipse Rich Client

Automatic Layout

KIML – KIELER Infrastructure for Meta Layout [2]

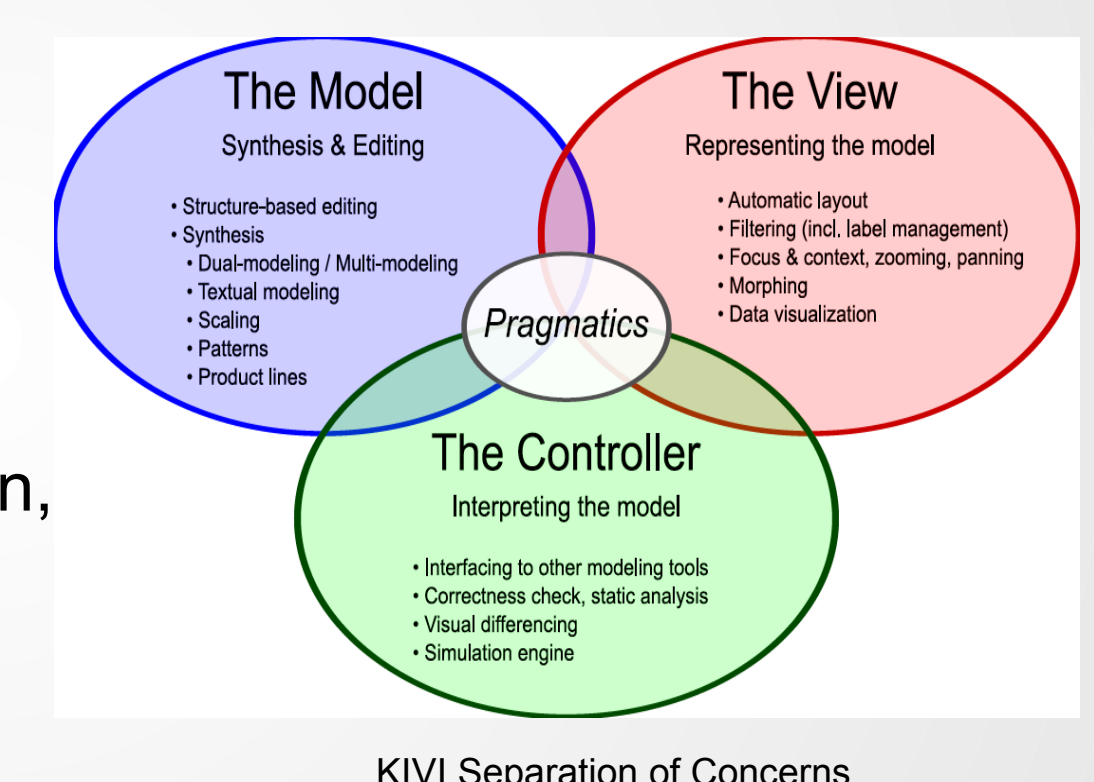

- Automatic layout of GMF and Graphiti diagrams
- Generic interface for layout algorithms
- Flexible configuration of layout options by the user

View Management

KiVi – KIELER View Management

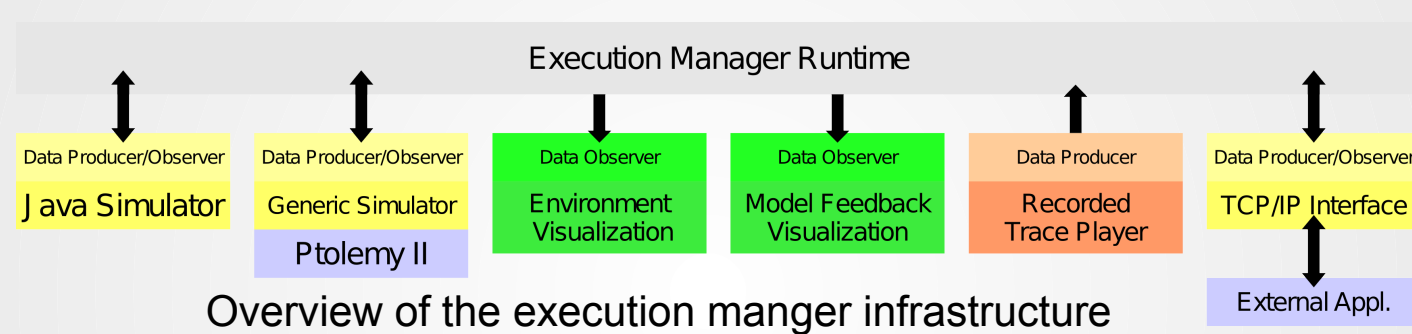

- Dynamic Views
- Decouple trigger and effects
- Advanced effect scheduling/filtering
- Button/UI trigger
- Focus&Context, Zoom-To-Selection, Diagram highlighting, Layout effect

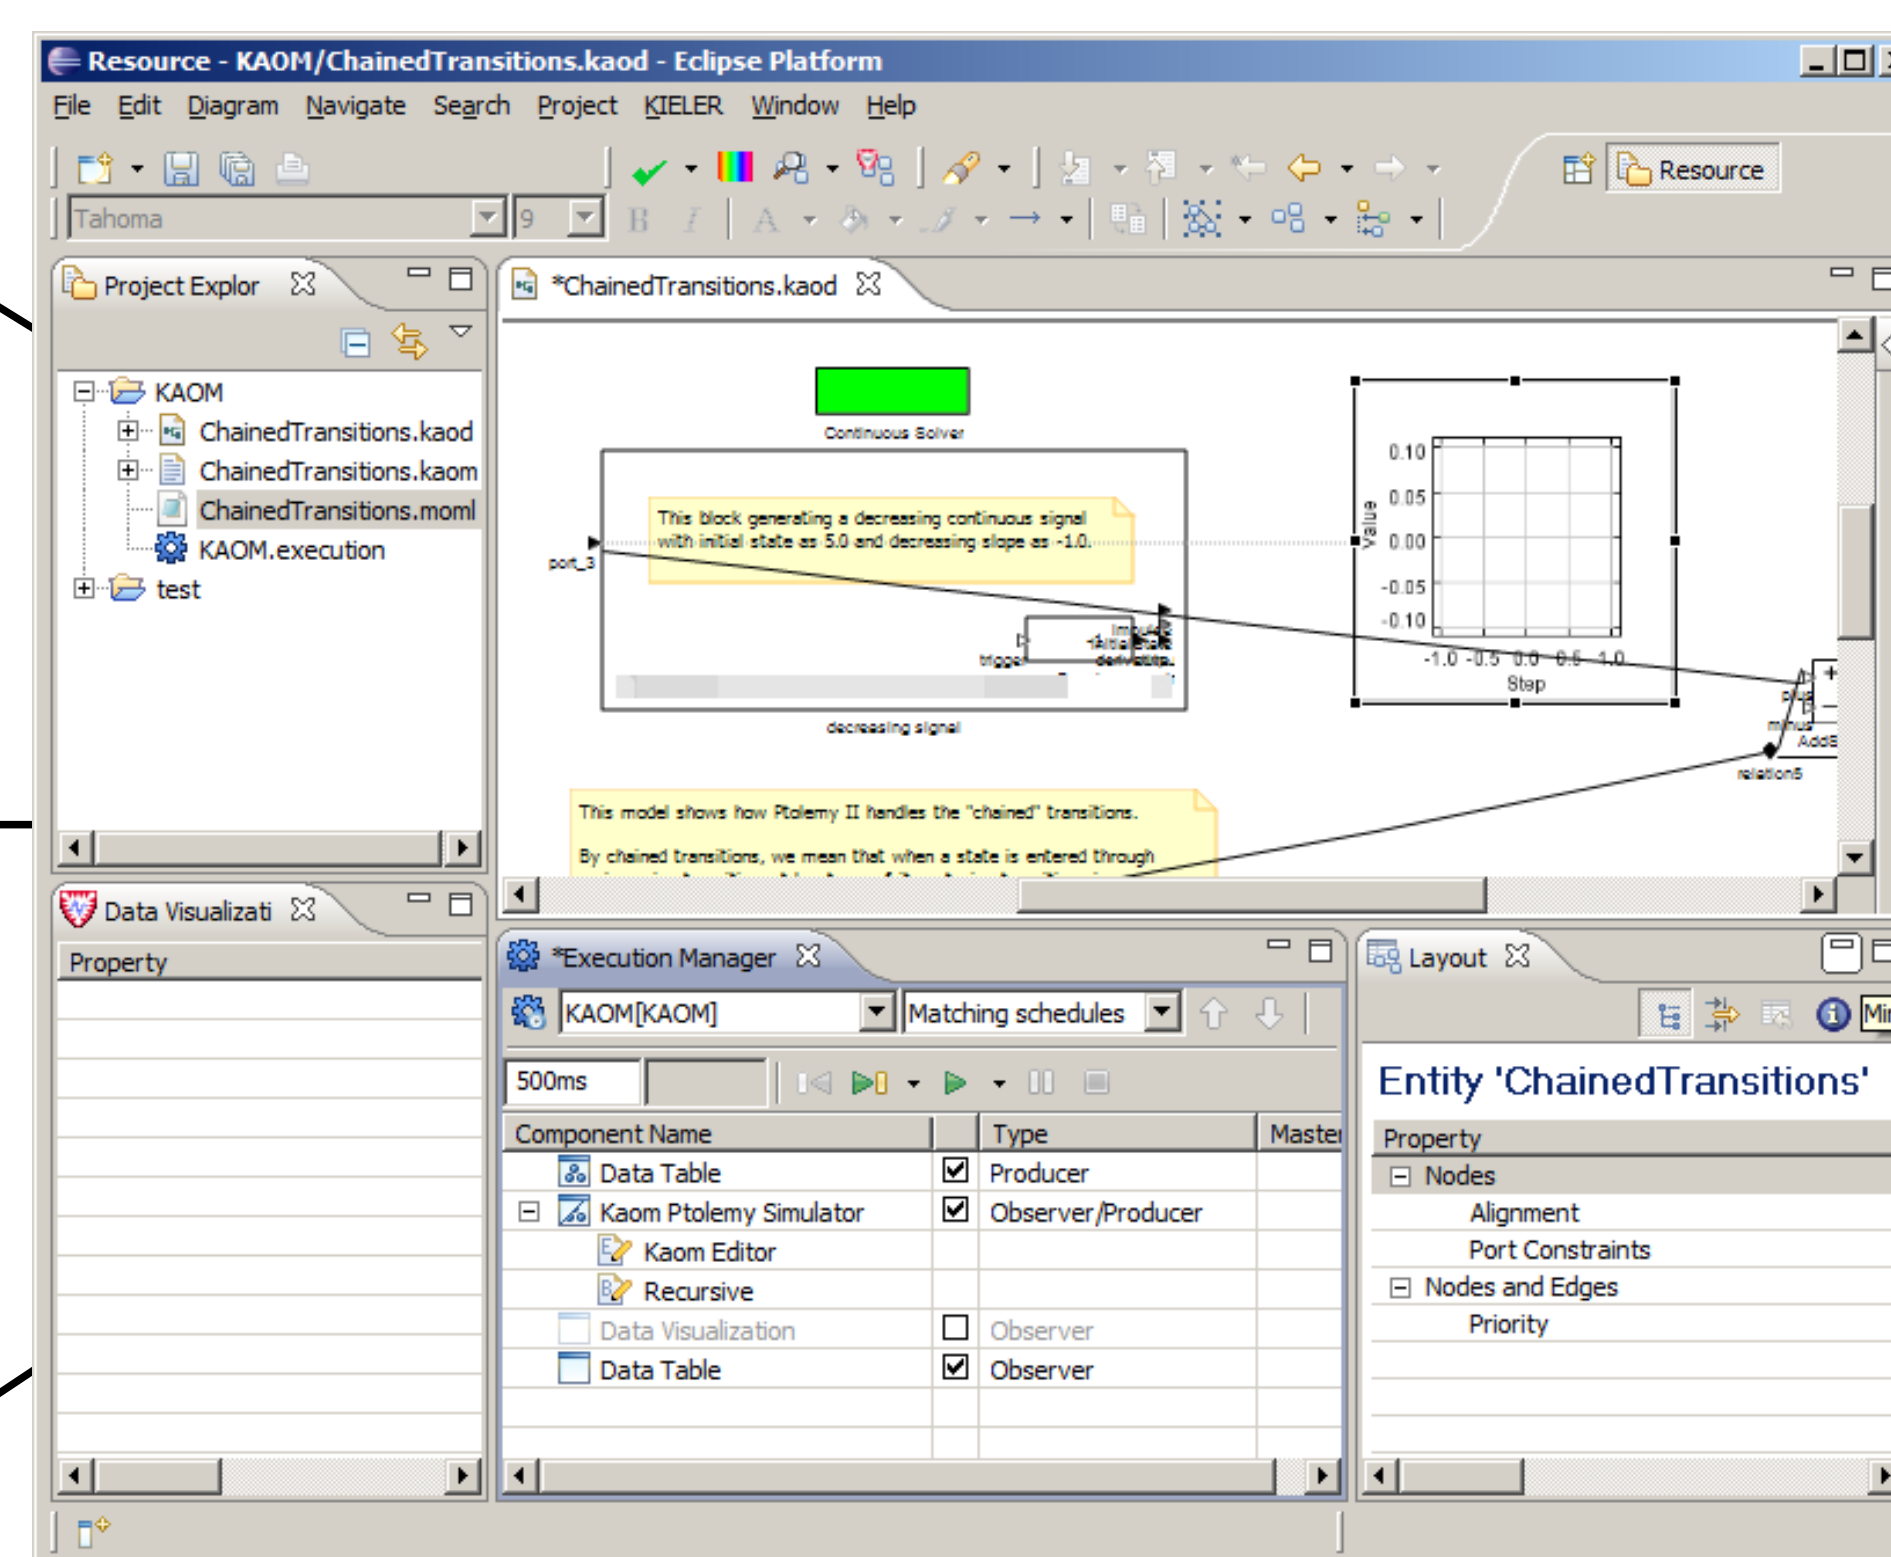

KIVI Separation of Concerns

Model Execution

KIEM – KIELER Execution Manager [3]

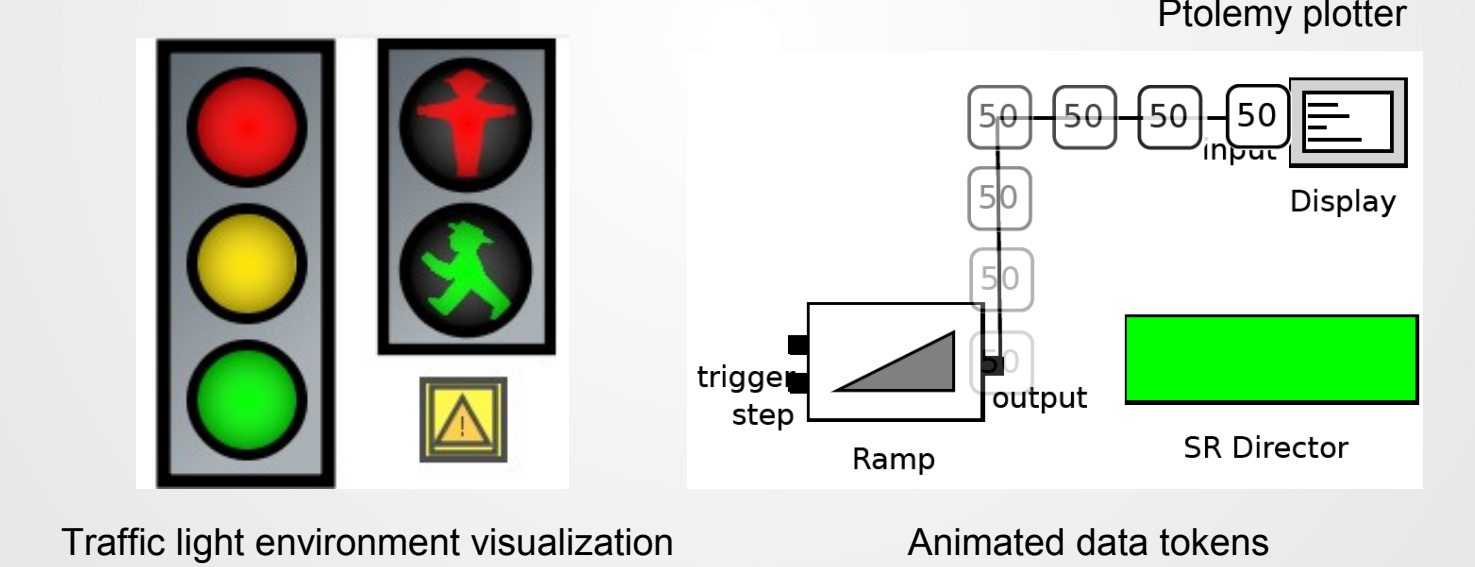

- Simple Interface for generic model execution
- Simulation, code generation, online debugging, visualizations, stepwise transformations, model verification
- Ptolemy as one simulation backend

KAOM with automatic layout, Ptolemy rendering and simulation in KIELER

Data Visualization

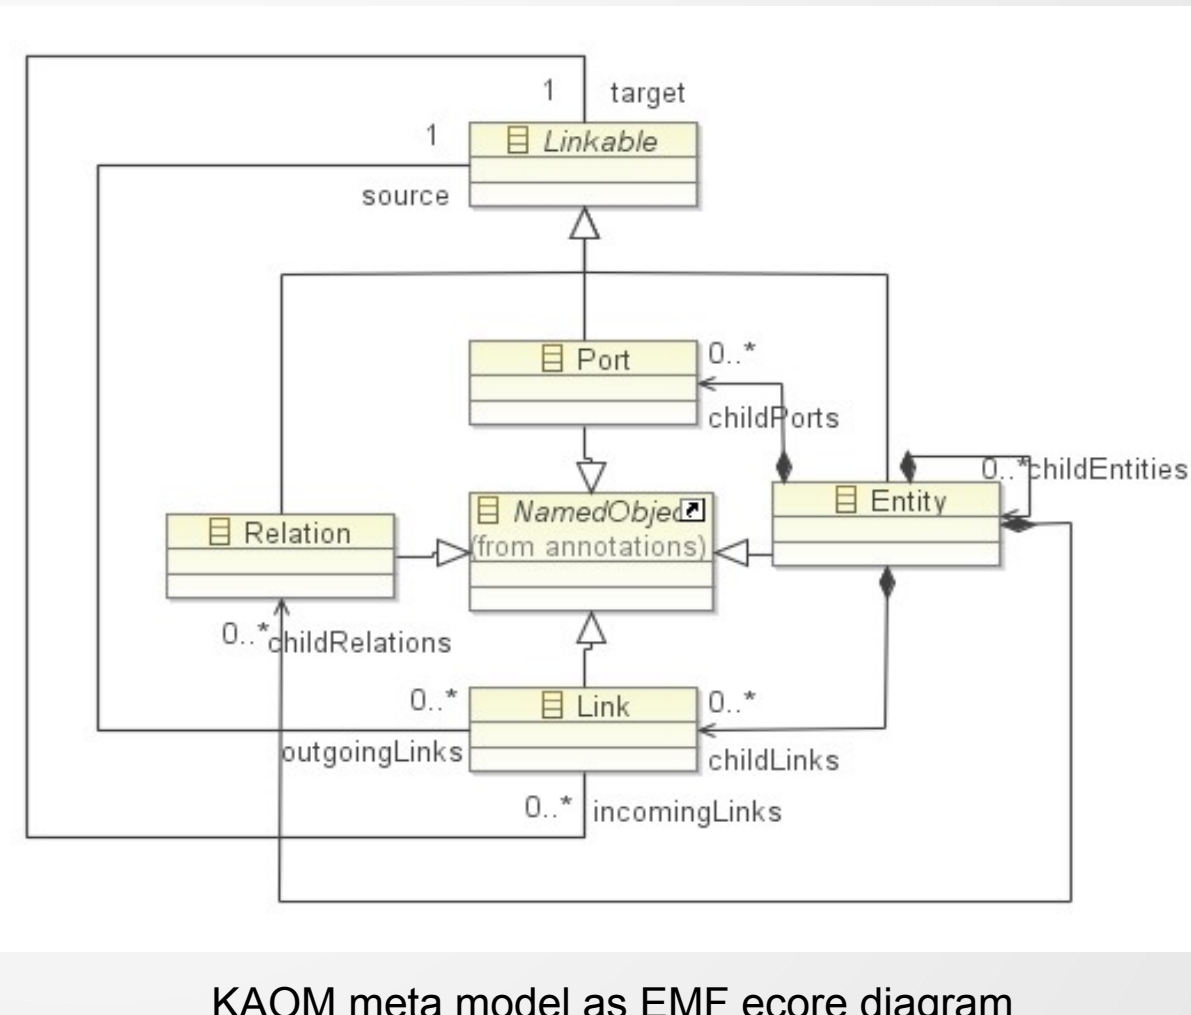

- Animated tokens
- Plotter scopes
- Environment visualizations

Meta Modeling

KAOM – KIELER Actor Oriented Modeling

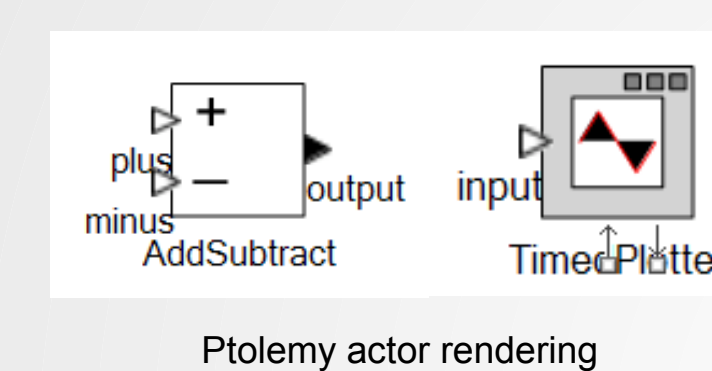

- Flexible, generic meta model for actor-oriented modeling languages
- Extendable Annotation concept
- Exploiting the Eclipse Modeling Framework (EMF)
- Code Generation w/ Xpand/Xtend
- Multiple editing frameworks supported: EMF, GMF, Graphiti, Xtext

KAOM meta model as EMF.ecore diagram

Model Rendering

KARMA – KIELER Advanced Rendering for Model Appearance

- Customized model rendering options: E.g., Ptolemy, LabView, Simulink, ASCET, SCADE
- GMF editor support, Graphiti (planned)

Rendering Ptolemy dataflow

This block generating a decreasing continuous signal with initial state as 5.0 and decreasing slope as -1.0.

Rendering Ptolemy state machines
